

Dear Sir/Madam,

My name is [*name and last name*], and I am from València (Spain).

I am currently about to finish my *second year of a Higher VTC in [name of the training course]*, and I would like to apply for an internship abroad. Given this situation, I believe that the Erasmus Plus programme is a good opportunity for me, to grow both personally and professionally.

From a personal point of view, I am a very motivated person willing to learn a lot while working in the automotive area. Besides, when I finish my [*name of the training course*], my intention is to continue studying a(n) [*college, another training course, etc.*] at the [*name of the institution*].

From a professional point of view, I am so driven to acquire further knowledge of the different tasks held in a garage, to improve my level of English, or to begin learning other languages. Therefore, improving my CV will allow me to apply for more qualified and high responsible jobs.

Finally, I think that taking part in the Erasmus + programme will offer me a perfect combination to learn new things, and work at the same time. Moreover, it would give me a broader sense of what Europe stands for, and what it means to be a European citizen.

I'm looking forward to hearing from you soon.

Yours Sincerely,

[*Name and last names*]
