

TAKE PUBLIC TRANSPORT

The use of private transport is becoming increasingly unsustainable for the environment.

The systematic use of private vehicles causes major problems in cities, such as traffic jams, noise and pollution, and the use of public transport should be promoted as an alternative.

Tips for saving on transport:

- You should use alternative means of transport to the private car, such as bus, train or metro.
- The use of public transport is the most environmentally friendly alternative for inner-city travel.
- If you have to use your car, you must share it with other people
