

Save energy at home

Electricity consumption is skyrocketing worldwide, causing great damage to the environment.

Here are some tips to reducing energy consumption at home:

Making the most of natural light.

Iron clothes in one go.

Unplug unused appliances.

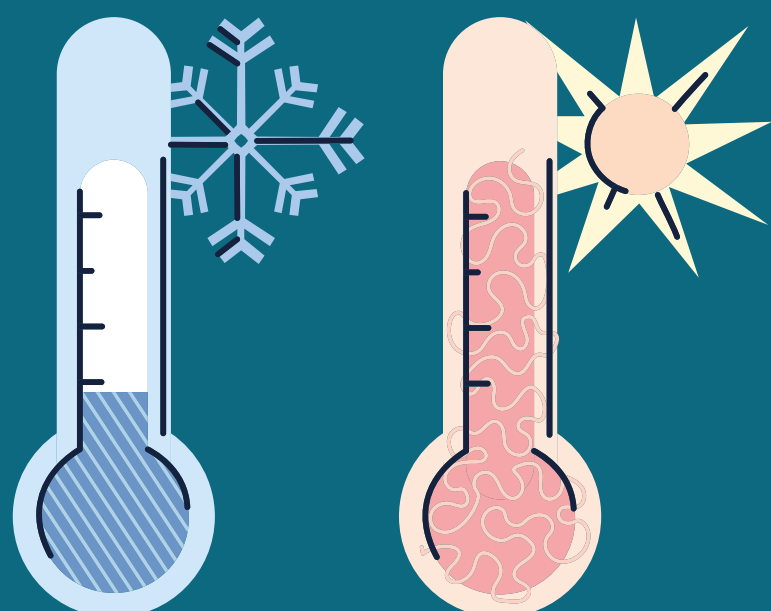

Turn off lights.

Maintain the right temperature in your home:
Winter: 20-23 degrees Celsius.
Summer: 22-25 degrees.

Avoid keeping the freezer and fridge open.

Light you turn off, light you don't pay for.
Improve the world!
