Erasmus project :

2020-1-ES01-KA202-083176

The main goal of our project is the implementation of innovative practices, mostly the application of techniques of Black theatre with Vocational Training students, and students with needs to be developed on collectives of dependent people or with disabilities.

Travelling is the basis of our knowledge, sharing experiences, ways of doing things, methodologies, friendship and common projects is without a doubt the best way to grow as people. From this point, everything in life is a journey, real or imaginary, but moving to another environment has been almost a necessity, everyone has seen beyond the horizon, crossing the seas, mountains, rivers, cities, deserts and even planets. Travelling has always been, hand in hand, with the human condition, we travel for various reasons, from the primary reasons, famine, wars, misery....even the most personal ones such as curiosity, the desire to learn, spirituality....

It is true that our students have been travelling around the continent for years in order to expand their knowledge , live experiences, make new friends and discover beautiful places to live in. Europe provides a wealth of new experiences and learning to any student.

Unfortunately, nowadays, daily travelling is more and more complicated.

We have lived in a year in which going from one village to the next one, to another region, to another community was more than a journey. We have lived some months when going shopping was a great journey, when taking the dog for a walk was a big journey.

The song of hope we are presenting in a minute is just intended to take the audience on a journey towards life,towards the essence of people and their communities and towards exciting projects that will bring us together and will allow us to meet again in common places.

Now that travelling is not at all easy we want to invite you to make an introspective journey to yourselves, to show you the essence of each place, so everyone can enjoy the wonders of Greece, Turkey, Portugal and Spain, through theatre as a valuable resource to move from one place to another. A pandemic is not enough to stop us from having our dream, we start our journey stronger than ever.

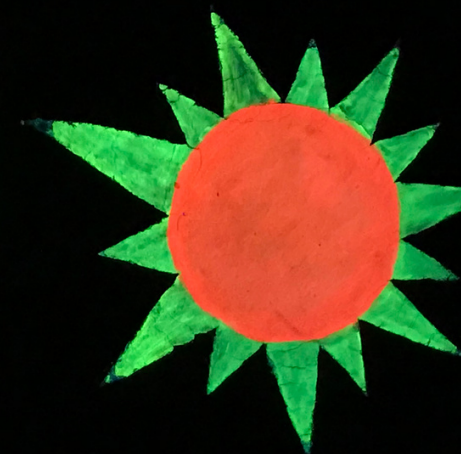

Welcome to the project "Thinking black and betting on equality"

May this experience provide us with the lasting bonds of friendship.

We hope all of you enjoy the experience, we are sure you will!

I'm coming from far away and I'm still going further
designs of joy and light push me
I'm coming and the wind of so many years burned my face
but I have the flame in my eyes.
There's no sorrow that takes me away from my long path,
everything I want is in front of me
and the time receives me in its bed.
I'm coming to bring you a hope song with my voice
if you wish to share it with me.
Everything that I expect is the mystery of a far away sea
and a horizon , always distant
that it will be clearer with you.
I'm coming from far away and I'm still coming further
full of dreams and light.

Im only there if you want to be there,
I have no other truth
neither deceptions nor any great mystery,
if you go there, I go too.
I have no country without you,
I don't have tomorrow either,
therefore I keep my challenge forever,
only if you go, I go there .
I'm there if you want to be too,
just to make a path together,
for the joy of following the footsteps
which have taken us far and wide.
For the pleasure of an exciting tomorrow
because we are at ease with it
making the art of living on and on
to be able to live the dream of a fairer world.
You have your hands, you have your heart,
you have the keys to open the horizon of light.

Flags are worthless if they do not give us a shelter
not to be cold of the long wait,
of the great name ,freedom.
Without you , no burning flag is useful,
no symbols nor exploits
will submit to you
you are the one who moves the wind.
I'm there because you want to be there
and nothing will be easy
but all the way I'm waiting for will have a name and sense.
The joy of taking off that dream
where everyone finds a place,
build a shortcut that will take us
to a better and happier world forever.
I'm there because you want to be there
but nothing binds me here,
without you I am unable to understand
no tomorrow, no country.
I proclaim that the flags
I only love them and make them mine
when they are useful to you.
We will be only if courage makes us
go further from here,
we will be only if we are exalted
to win so much as to share
we will be a free country
if we, its children, are free
and this challenge will make us richer.
You have the hands, you have the heart,
you have the keys to open the horizon of light.
