6 Apply a final layer of clear building gel and dry in the lamp.

7 File the nail and apply a layer of top coat.

DEPILATION

WARM WAX WITH SPATULA PROCESS

First step we have to prepare the wax warmer, while its warming we preparate the table and work space with bed disposable cover

After that we have to preparate and clean the body area we are going to wax then we can start.

With a wood depressor we apply a thin layer of wax and we put over it a cellulose strip and pull against hair, and repeat the process on all area, if there is still some hair after than pluck remaining with tweezers

When your job is done put some after wax oil and clean and tidy the work area.

You need an mosturized skin?

thats your foundation!

it as the coverage as a
foubdation and also the
moustur as a serum

*You will look
like a doll*

PERFUMERY

ESSENTIAL OILS

DEFINITION

An essential oil is a concentrated hydrophobic liquid containing volatile chemical compounds from plants. Essential oils are also known as volatile oils, ethereal oils, aetheroleum, or simply as the oil of the plant from which they were extracted, such as oil of clove. An essential oil is "essential" in the sense that it contains the "essence of" the plant's fragrance—the characteristic fragrance of the plant from which it is derived.

Tea tree: Tea tree oil, also called tea tree oil, is an essential oil derived from the native Australian plant *Malaleuca alternifolia*. It is one of the most popular components because it has antibacterial, anti-inflammatory, antiseptic, disinfectant, antimicrobial, antiviral and antifungal properties

Azahar : According to the evidence found to date, orange blossom has mainly flavoring, sedative, hypnotic, antispasmodic and digestive properties. Therefore, it has been used as a tonic and as an infusion to relieve various discomfort

Juniper: Juniper is a medicinal plant of the species *Juniperus communis*, commonly known as landscaping, cimbri, anavio, among others, whose fruits are round and bluish or black. The fruits are also known as juniper berries and are rich in oils such as myrcene and cineol (eucalyptus), in addition to flavonoids and vitamin C, so they are used to treat various health problems, especially stomach and skin conditions, inflammation and urinary tract infections.

PERFUMERY

ESSENTIAL OILS

DEFINITION

Eucalyptus: Specifically, in the field of medicine, his powers as a nasal and respiratory decongestant are recognized. While, in some nations it is used to manufacture chemicals, as a powerful insect repellent and in Australia it is associated with the main food of tender koalas.

Geranium: Geranium essential oil offers multiple health benefits - mainly that of our body and our skin - that can be attributed to its excellent properties as a cleanser, astringent, tonic, and for the prevention and treatment of wrinkles. The different studies that support these properties and their natural origin have made geranium essential oil one of the outstanding ingredients for skin treatment.

COMPANY

COMPANY PROJECT

-BUSSINES IDEA

Trade name and justification: ELMAS : The word ELMAS means diamond in Turkish, which refers to the philosophy of the company, which is the search for rough diamonds in the world of make-up to open the doors of this fantastic world of work. It also resembles the word to SOUL and it is necessary to put a lot of love and heart in this profession.

Logo:

Phrase that defines the idea: In search of rough diamonds.

COMPANY

COMPANY PROJECT

Description of the idea: The idea consists of an agency / academy of make-up, will be a company that will hire at its discretion its own team of make-up for fashion shows, advertising campaigns, Etc. That is to say, the intermediaries with which the big brands will be placed in contact for the hiring of the maquilladores thus saving them the selection process and hiring and leaving it in the hands of a specialized company. The company will have a catalog of make-up machines that you will go to when you need to hire them for a job requested. And to complement this activity the company will also have a school where courses and classes will be offered to continue training professionals and new promises from the world of makeup.

Competitive Advantage : It is a scarce business idea in the industry and in Spain at the moment and facilitates the search for employment for both makeup and companies seeking qualified personnel. It visualizes and accommodates make-up in the world of make-up. It facilitates the process of hiring make-up machines to large companies in fashion, television, cinema, fx, etc.
