# Men's cutting techniques

## Gradient with comb and scissors

1. We welcome you and invite you to sit down
2. Protection of the client, we put a towel on her and accompany her to the head wash
3. Hair hygiene, we wash your hair

4. We accompany her to the dressing table and we put the cutting cape on her, she fastens with the buttons behind the cape

5. We take the comb and scissors and begin to degrade from bottom to top perpendicular to the scalp

6. At the top we make an angle of  $90^\circ$  with the comb and scissors and the fingers parallel to the scalp

7. We will cut the contours with the scissors, being careful with the ears

8. We put wax all over the head, distributing it with our fingers and hands
