On Monday, we visited Puerto de Sagunto following the **industrial heritage tour** which showed us the most remarkable places in the **Factory Town**. By following the tour we learnt about how the industrial growth of the city affected its citizens. **The factory - Altos Hornos de Vizcaya y del Mediterraneo-** was the heart of the city and many important facilities were built at that time (*a hospital, the school, some houses for the workers, a supermarket, etc*).

Then, we had the opportunity to promote **team work** by following the **mathematical path** about some of the icons of the **Factory town**.

Once we had finished the visit we came back to the secondary school to do our **Food Workshop**. We had the opportunity to show you one of our best known recipes: **Paella**. Hope you like it!

On Tuesday, we cycled to Canet d'en Berenguer where we enjoyed the sea by doing **Paddle surf and Kayak**. Later we had a P.E workshop and we finished the day at the beach enjoying the sunny weather.

On Wednesday, we went by train to Cabanyal where we visited the traditional market and the **Climate Change Observatory**. There the tour guide told us about how this observatory helps **raising awareness of the Climate Change**, which is one of our main topics in the project.

To continue the visit we headed to the river where we had some spare time to eat. We finished the day at the **Arts and Science Museum**.

On Thursday, we cycled to **Casa Penya** a traditional house used to preserve the wetlands. There we visited the surroundings and we discovered the four different parts of a wet ecosystem. **Preservation of the environment** is also another milestone of our project, the tour guide also told us about the importance of taking care of the animals, insects and plants that live there.

That afternoon we had the **farewell party** with the families. They all prepared delicious dishes and we had a great time. Before leaving we took the tradicional picture remember this amazing week.

On Friday, we had little time to spend together as part of the group had already flown back to Denmark.

We did some **evaluation activities** about the week to improve and share the experience. We also had fun in a music workshop offered by our music teacher.

Later, after having a snack, we took the bus to go to Sagunt.

In Sagunt, we had the opportunity to visit the Roman theatre and the Jew neighbourhood. The mayor met us at **La Via del Portic** (a very well preserved Roman path), it was lovely talking to him... He even decided to join us in a *Tiktok* video! **Using new technologies** can be handy to promote our activities and to raise awareness of young people. When the taxis arrived, everyone was a bit sad but we were eager to see each other again in the following *Erasmus+* trip. Thank you and see you soon!
