JOB SHADOWING IN TIRANA (ALBANIA)

DESCRIPTION

From April 22 to 27, 2026, we carried out a "**Job Shadowing**" in the city of **Tirana** (Albania). We were a group of 8 teachers from different centers in the Valencian Community. Our contact in Tirana was the wonderful **Albacademy** team. We had the opportunity to visit two of the most prestigious technological institutes in Tirana.

SHKOLLA HERMANN GMEINER

Shkolla Hermann Gmeiner is one of Albania's leading centers for technical education, located in Tirana. Established in 2014 and modeled after the Austrian technical school system, it specializes in Information and Communication Technology (ICT). The school is highly regarded for its Software Engineering and Networking programs, which combine rigorous academic theory with hands-on practice. By maintaining strong partnerships with over 70 tech companies, it ensures students gain real-world experience and high employability upon graduation. In recent years, it has consistently produced top-tier talent, frequently winning national skills competitions in digital development.

SHKOLLA GJERGJ CANCO

Shkolla Gjergj Canco is one of Tirana's most established and respected public vocational institutions. Originally renowned for its expertise in **Electrotechnics** and **Automation**, the school has successfully evolved into a modern hub for technical and digital education. Today, it offers specialized programs in electrical installations, telecommunications, and repair of electronic equipment, alongside newer profiles such as **Multimedia** and **Programming**. With a recently renovated campus and advanced laboratories, the school follows the **dual education model**, partnering with industry leaders to provide students with practical internships. It is a key player in Albania's "Skills for Jobs" initiative, preparing a skilled workforce for both the industrial and IT sectors.

PLANNING

04/22/2026

**Welcome “Herman Gmeiner”
WEB apps projects with AI**

04/23/2026

**Girls’ Day
Client WEB programming projects**

04/24/2026

**Welcome “Gjergj Canco”
Class visit**

04/27/2026

**Networking projects
Farewell**

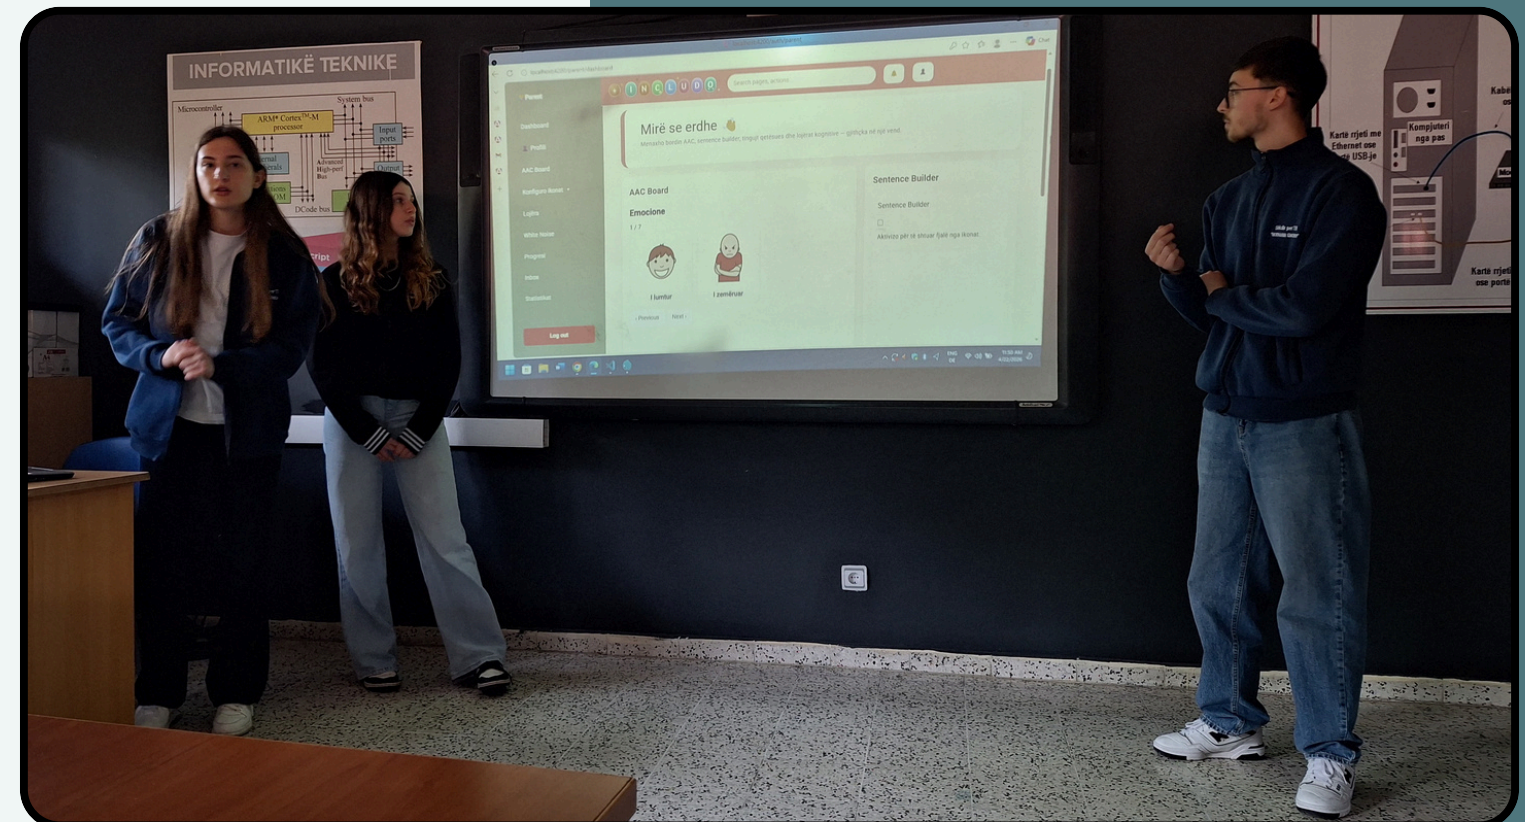

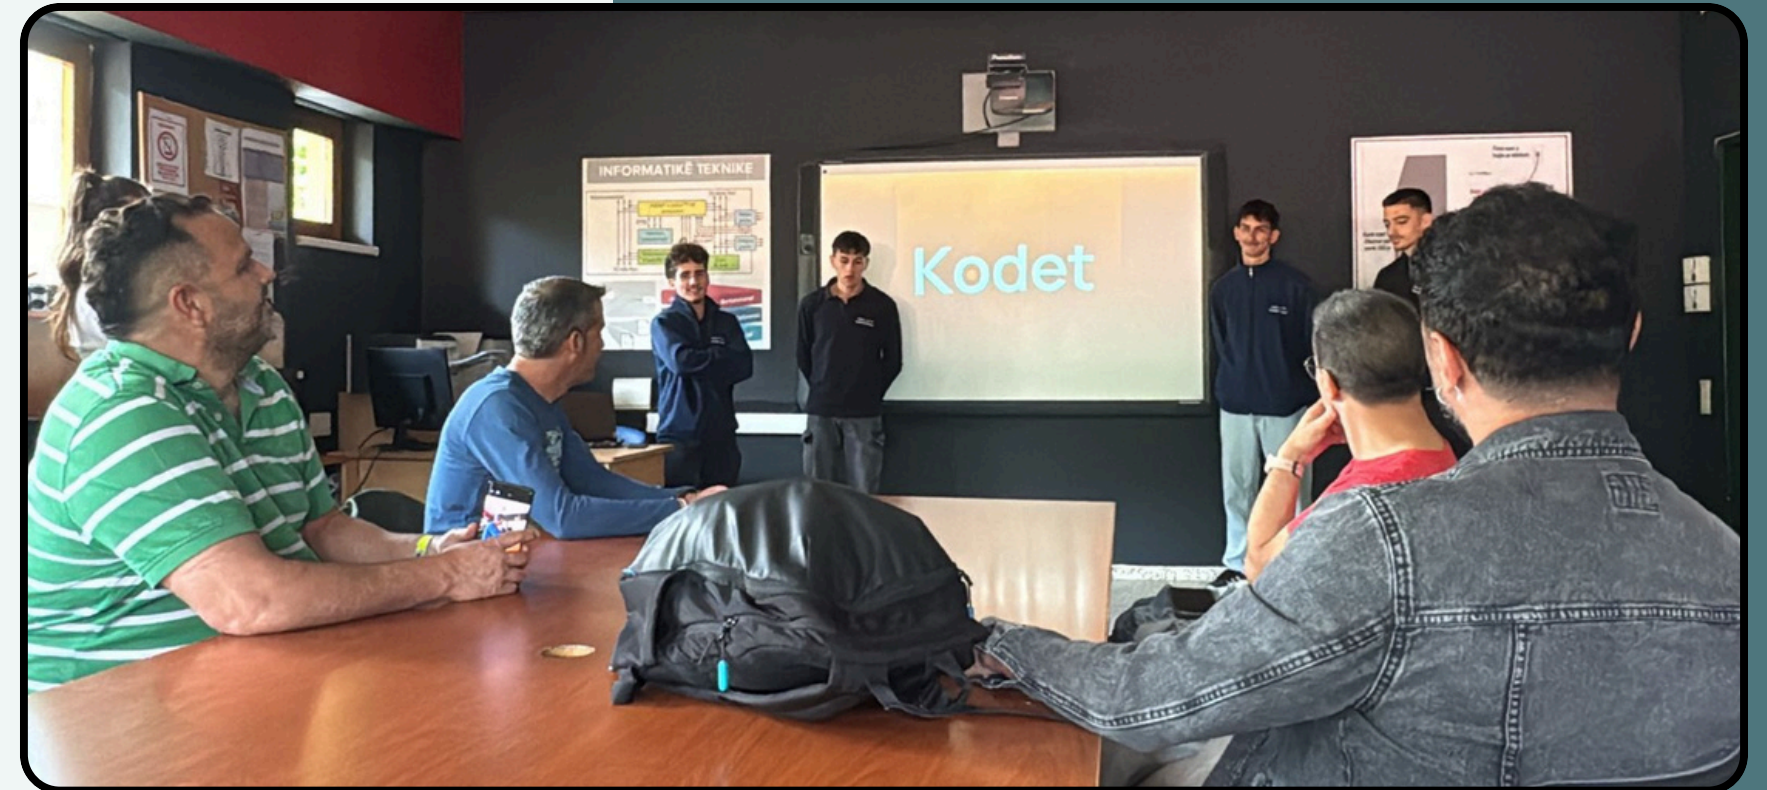

04/22/2026 WELCOME "HERMAN GMEINER"

04/22/2026 WEB APPS PROJECTS WITH AI

We were able to attend the presentation of web application projects with AI.

We were amazed by their ability to work in a team, their way of presenting their work and their incredible level of English.

04/23/2026
GIRLS' DAY

We could enjoy the International Girls in ICT Day (the fourth Thursday of April) to promote equality and the empowerment of Albanian women and girls.

Their female students presented projects and organized activities for girls from other schools to encourage them to study Computer Science.

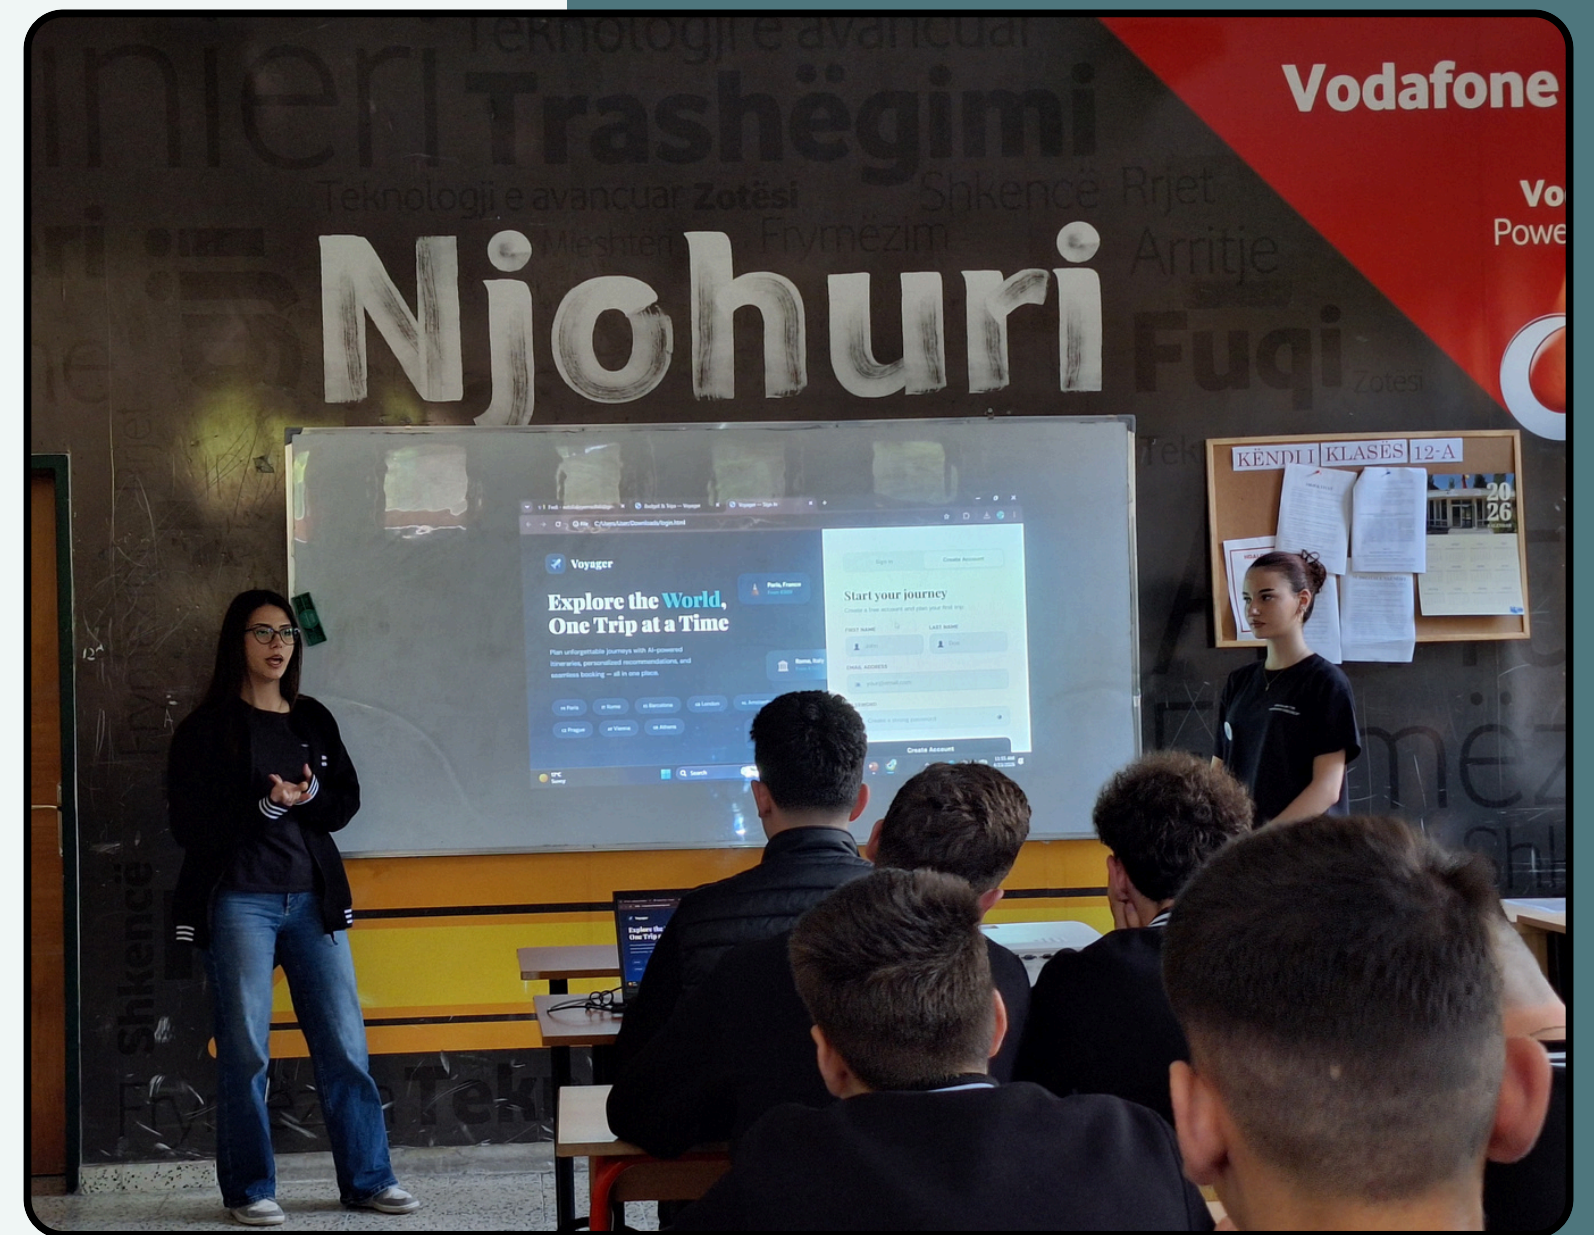

04/23/2026

CLIENT WEB PROGRAMMING PROJECTS

We were able to attend the presentation of projects created with client technologies: html, css and javascript.

We were amazed by their ability to work in a team, their way of presenting their work and their incredible level of English.

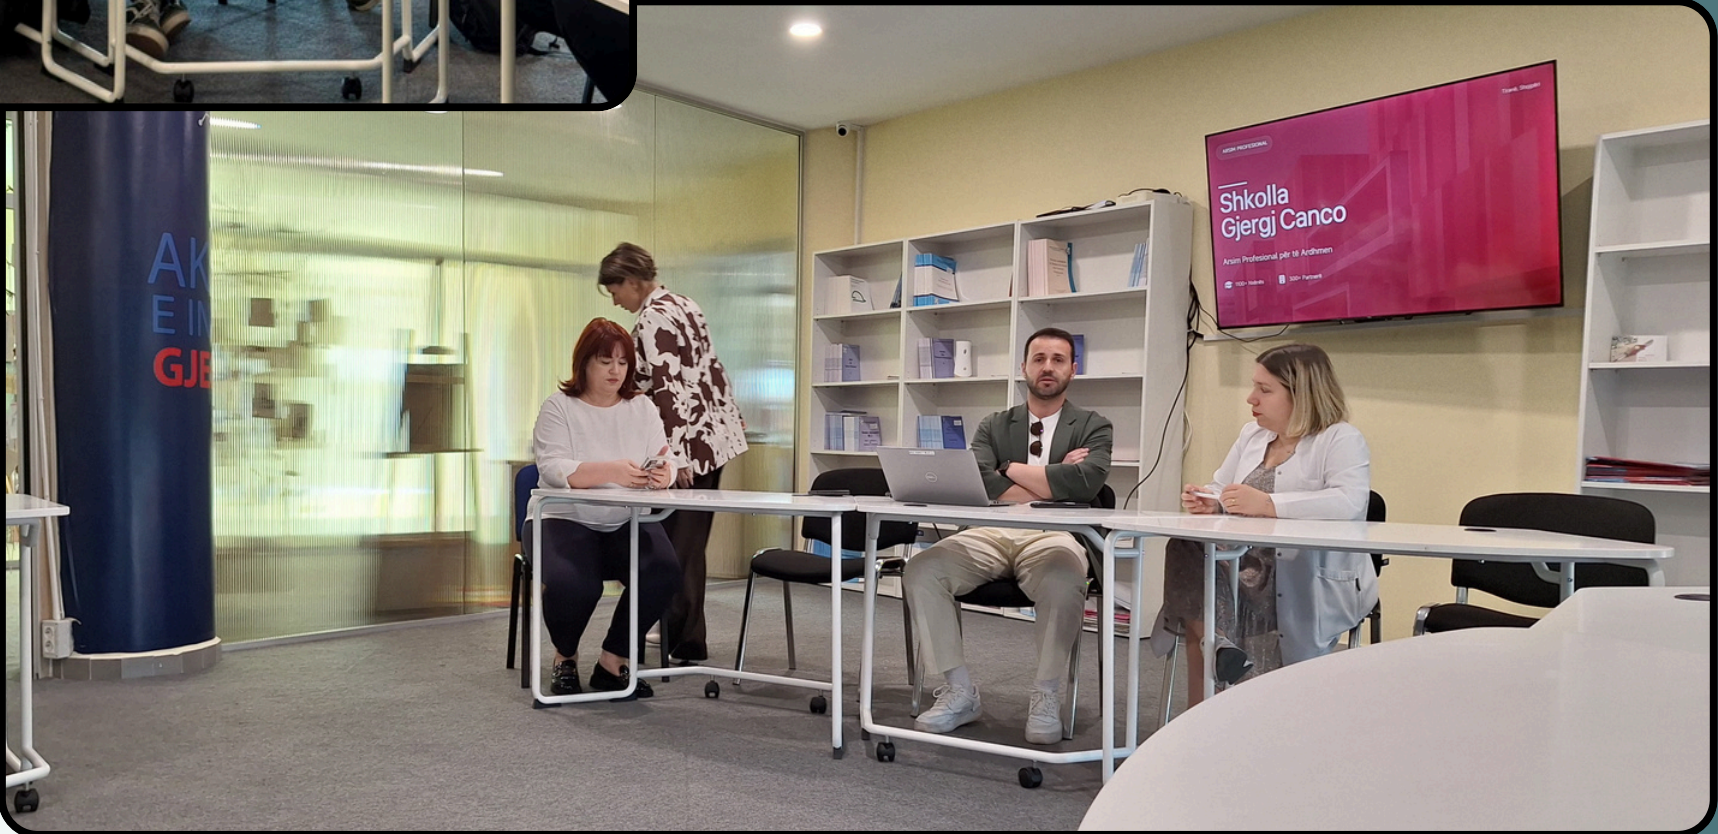

04/24/2026

WELCOME "GJERGJ CANCO"

04/24/2026 CLASSES VISIT

They gave us a masterful presentation of their center and the studies carried out there, and then we visited their classrooms and workshops, as well as being able to talk to their students.

04/27/2026 NETWORKING PROJECTS

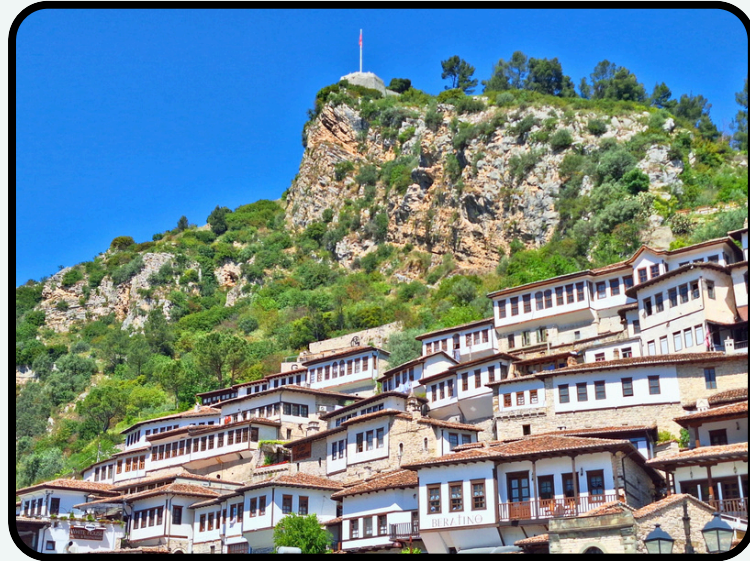

We were able to attend the presentation of study and deployment projects of communication networks such as companies, hospitals...

We were amazed by their way of presenting their work and their incredible level of English.
