

What do you think about the pollution in Portman?

It was a very important problem, and i think, but the sea before and after are very diferents

Oh my god! Look this sea !, this when it was contaminated

Portman bay before contamination

Portman bay 1950

They look so diferents!, but do you know how this happened?

Between 1957 and 1990, Peñaroa dumped 7.000 tons daily of zinc, cadmium, remain of remeatges and lead

What is the condition now of Portman Bay?

Now the Portman bay is dirty since 30 years ago, and now this contaminatios is expanding through the Mar Menor

that is terrible! 😞
