

# Valencia flood of 1957 and 2024

# INFORMATION

- *1957:*

- It happened between October 14 and 15, 1957 in the Turia river basin.

- Not all the missing were found, and many of the dead were not identified.

- Photos of the deceased were placed at the door of the courthouse so that their relatives could identify them.

- 300l/m<sup>2</sup> fell.

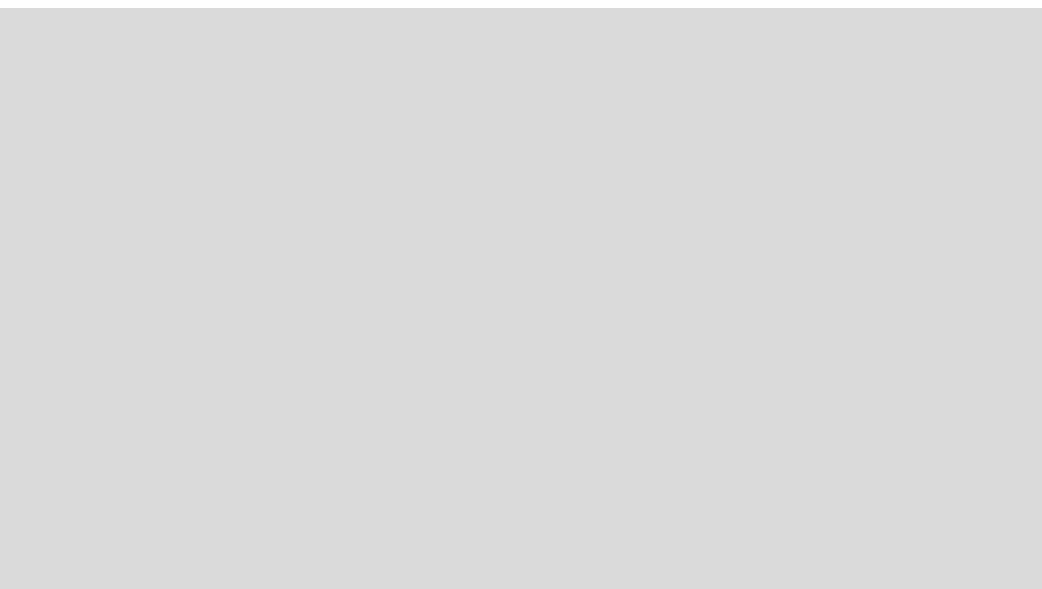

# INFORMATION

- 2024:
  - It occurred between October 29 and November 15 due to the overflow of rivers in Valencia.
  - Not all the missing have been found, but the dead have been identified.
  - The number of deaths was said by the media.
  - More than 3001/m2 fell.

# REASONS FOR THE 1957 FLOOD

On October 14, 1957, as a result of a strong storm, a sudden increase in the flow caused the river to overflow in the Valencian capital, where it had its mouth.

In two consecutive floods, separated by approximately 12 hours, the water flooded everything.

# REASONS FOR THE 2024 DANA

Due to the poor cleaning, the rain took away all the vegetation, which caused a blockage in the dam and all the water along with the waste came out.

Torrential rains caused a cold drop.

# CONSEQUENCES OF THE 1957 FLOOD

- City Flooding.
- There were 81 deaths, although it is suspected that the real number of victims was much higher.
- The flood swept away vehicles and destroyed infrastructure.

# CONSEQUENCES OF THE 2024 DANA

- It made its stagnant waters susceptible to infections if they were in contact with it.
- They destroyed houses, schools, businesses.
- It caused 227 deaths.
- It caused accumulations of mud that brought bacteria.
